The village was shocked to hear of the death of Silas L. Taylor last week Thursday noon. Mr. Taylor was taken sick Wednesday night and summoned the doctor. He remained in bed until about 1 o'clock when he attempted to rise but fell back dead. Heart failure was the cause of his death. For a number of years he has been agent for the Singer sewing machine and was well known and liked by many. Let us think of it.

Deafness Cannot be Cured by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Deafness and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its former condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is often but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circular, free.

HOW IT LOOKS

The holder of a matured Endowment Policy in the Equitable Society sends us the following graphic illustration of his feelings: "Twenty years ago, when I was induced by a persistent agent to take out my Endowment policy, the premium looked very large and appeared to me like this:

\$49.79,

While the Endowment, looked at through the wrong end of the telescope of 20 years, appeared like this:

\$1,000.00.

Now my policy has matured, and coming just when I need the money, the result of my policy looks like this:

\$1,568.02,

While looking back at the annual premiums I have paid, and realizing that they are amounts that would have been saved in no other way, this is the appearance they have:

\$49.79.
